

The South-central Partnership for Energy Efficiency as a Resource

As the current pandemic continues to push our lives and country into uncharted territory, SPEER is diligently working on efforts to increase awareness and communication during these unprecedented times. Though no one knows what the future has in store, changes will abound, including changes to how energy efficiency is viewed by both legislatures and the public. By working together, we can ALL help to keep energy efficiency at the forefront of the discussion on equity, social justice and improving the lives of all.
