

JOIN SPEER

COMMIT TO HELPING EXPAND ENERGY EFFICIENCY AND
CREATE A MORE SUSTAINABLE, HEALTHY ENVIRONMENT.

2022 by the numbers: 95% Member Retention Rate
22% Increase in Membership

At SPEER our mission is to accelerate the adoption of energy-efficient products and services in Texas and Oklahoma. We strive to accomplish this through:

- Building and leading diverse partnerships among all stakeholders
- Providing science-based resources and trainings for our members and partners
- Promoting policies that advance energy efficiency, technology, research, and other innovations

As the regional leader in the education and promotion of energy-efficient building systems and distributed energy resources, with your support, together we can strengthen local economies, improve health and quality of life, and protect the environment.

Building Codes

We continue to be the go-to resource for plan reviewers, inspectors, builders, cities, counties, and schools for energy codes and energy efficiency in Texas and Oklahoma.

Policy

SPEER works closely with state agencies and policymakers to identify and develop policy recommendations to increase energy efficiency deployment in the region. We provide the Public Utility Commission of Texas (PUCT) with educational materials on the benefits of efficiency as well as engage with stakeholders & the PUCT through public comments and working groups.

Heatpumps

SPEER facilitates a working group of heat pump manufacturers & implementers to identify policy recommendations and future efforts to increase the deployment of highly efficient heat pumps throughout the region.

Local Governments

Served 21,873,490 residents in non-attainment regions through our Energy Reporting Program.

Over 106 agencies & local governments participated and engaged in our roundtables in 2022.
